SCHOOL BASED ASSESSMENT TEST

STANDARD 5 - YEAR 2021

SCIENCE

READ THESE INSTRUCTIONS CAREFULLY.

Time: 1 Hour 40 Minutes

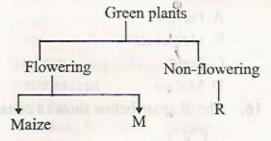

- 1. You have been given this question paper and a separate answer sheet. The question paper contains 50 questions. 2. Make sure that you have written on the answer sheet.
- In the initials AIDS the letter "D" stands 1.
 - for deficiency which means: A. to get from
 - B. to lack
 - C. many signs and symptoms
 - D. body's immunity
- Which one of the following is not a source of light?
 - A. Firefly
 - B. Torch
 - C. Stars
 - D. Moon
- Which part of the human digestive system is not correctly matched with the digestive juice produced?
 - A. Stomach
- Gastric juice \rightarrow
- B. Liver
- Bile juice
- C. Small intestine → Pancreatic juice
- D. Mouth → Saliva
- The diagram below shows a certain type of 4. a human tooth.

The function of the above tooth is;

- A. tearing and gripping
- B. tearing and crushing
- C. biting and cutting
- D. crushing and grinding
- The type of weed which is poisonous and 5. has thorns on its fruits is called:
 - A. thorn apple
 - B. sodom apple
 - C. mexican marigold
 - D. black jack

- 6. The second stage of HIV infection is known as:
 - A. asymptomatic
 - B. window
 - C. full blown
 - D. symptomatic
- Which phase of the moon is invisible from the earth?
 - A. Crescent
- B. Full moon
- C. New moon
- D. Gibbous
- Which one of the following is not a good behaviour when having meals?
 - A. Closing the mouth while chewing food.
 - B. Leaking the fingers when the food is delicious.
 - C. Not talking with food in the mouth.
 - D. Eating enough quantities of food at a time.
- The chart below shows a simple classification 9. of green plants.

Letters M and R represents;

- A. beans, cactus
- B. wheat, toadstool
- C. sugarcane, mushrooms
- D. green grams, moss
- A child who has brownish and thin hair is 10. also likely to;
 - A. look like an old person
 - B, have swollen parts of the body
 - C. feel hungry quite often
 - D. have visible bones and ribs

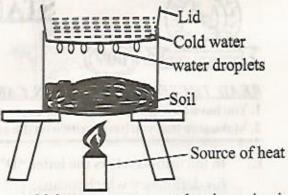

- In the digestive system the digestion of fats and oils take place in the;
 - A. small intestines
 - B. duodenum
 - C. large intestines
 - D. stomach
- The main reason why a raingauge is dug 15cm below the surface is to;
 - A. prevent surface water from splashing into the funnel
 - B. withstand harsh weather condition
 - C. prevent evaporation of rain water
 - D. make accurate measurement
- 13. Which group of foods below does not make a balanced diet?
 - A. Eggs, pawpaw, chapati
 - B. Water melon, spinach, ugali
 - C. Rice, meat, kales
 - D. Beans, ugali, oranges
- The type of soil that has a coarse texture is also likely to;
 - A. crack when dry
 - B. make the largest ribbons
 - C. have large air spaces
 - D. be the best for farming
- 15. The following are products from plants. Which one is not?
 - A. Papers
 - B. Medicines
 - C. Food
 - D. Mohair
- 16. The diagram below shows a certain plant

The plant can be classified as;

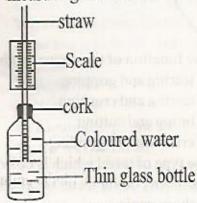

- A. a fibre crop
- B. a beverage crop
- C. an oil crop D. a tuber crop

17. Std 5 Pupils did the experiment below to investigate the components of soil

Which component were they investigating?

- A. Water
- B. Humus
- C. Air
- D. Mineral particles
- 18. Which of the following farming activities carried out by a farmer during a dry season?
 - A. Planting
- B. Weeding
- C. Harvesting
- D. Pruning
- 19. Which one of the following is not a problem related to teeth?
 - A. Bad breath
- B. Shedding teeth
- C. Tooth decay
- D. Tooth cavities
- 20. Which one of the following animals protects itself by coiling?
 - A. Snake
- B. Centipede
- C. Snail
- D. Millipede
- 21. Which one of the following is the importance of fibre in the diet?
 - A. Making blood
 - B. Cooling the body
 - C. Releasing nutrients
 - D. Preventing constipation
- 22. The diagram below shows a weather measuring instrument

Which one of the following happens when temperature increases?

- A. The scale increases downwards
- B. Water rises in the straw

- C. Water drops in the straw
 - D. The glass bottle breaks
 - 23. Which animal below is not an invertebrate?

A. Snail

B. Snake

C. Earthworm

D. Spider

24. Which of the following animals is harmful?

A. Fish

B. Dog

C. Hare

D. Termite

25. The following foods help in body building and repair except:

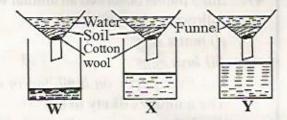

A. green bananas

B. eggs

C. beans

D. milk

26. Std 5 pupils did the experiment below to investigate drainage in different soils;

Which soil is rich in organic matter?

A. W B. X

C.Y

D. None

27. Which animal below is not an amphibian?

A. Frog

B. Toad

C. Gecko

D. Salamander

28. The following are functions of plant leaves except;

A. gaseous exchange

B. making plant food

C. anchoring the plant

D. storing food

29. Three of the following are ways of transporting water. Which one is not?

A. using pipes

B. using tankers

C. using taps

D. using animals

30. The soil that makes the longest ribbons

A. has the largest air spaces

B. cracks when dry

C. is the lightest

D has a rough texture

31. Which one of the following is not a proper use of medicine?

A. Taking medicine only when sick

B. Completing the prescribed dosage

C. Following the doctor's prescription

D. Sharing medicine with family members

The type of clouds found low in the sky 32.

A. are feathery

B. indicate fair weather

C. have a flat base

D. are mountainous

33. The following are modes of HIV transmission except one. Which one?

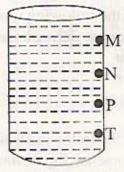

A. Blood transfusion

B. Sexual intercourse

C. Showing body-piercing tools

D. Sharing utensils 5

Std five pupils filled a tin with water as shown below.

Which hole threw water furthest from the tin?

A. M

B.N

D.T

35. The following are recreational uses of water except

A. skiing

B. swimming

C. making fountains D. surfing

36. The ability of the body to fight against diseases is called:

A. immunity

B. deficiency

C. syndrome

D. strength

37. Which one of the following produces sound by plucking?

A. Drum

B. Guitar

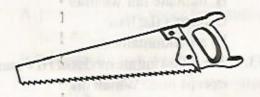

D. Flute C. Horn

The medicines taken to cure a known disease are called

A. antibiotics B. pain killers

C vaccines D. supplements

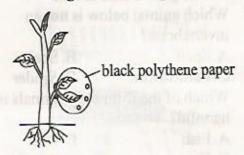

- 39. Which one of the following is not an effect of moving air?
 - A. Winnowing grains
 - B. Felling trees
 - C. Blowing away soil
 - D. Blowing off house rooftops
- 40. The diagram below shows a certain simple tool.

The tool shown above is used for

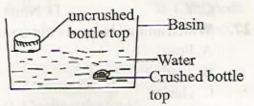

- A. trimming fences
- B. splitting fire wood
- C. cutting timber
- D. joining pieces of wood
- 41. Which one of the following is not a function of the nose during breathing?
 - A. Warming air
 - B. Cleaning air
 - C. Moistening air
 - D. Drying air
- 42. Which one of the following is not a maintenance practise for all simple tools?
 - A. Cleaning after use
 - B. Proper use of tools
 - C. Sharpening cutting tools
 - D. Oiling all tools
- 43. Which crop below is not a legume?
 - A. Groundnuts
- B. Peas
- C. Green grams
- D. Sorghum
- 44. Which one of the following is not a characteristic of all mammals? They
 - A. give birth
 - B. are covered with fur or hair on their bodies
- C. have a constant body temperature
 - D. are vertebrates
 - 45. Which one of the following is not an importance of proper lighting in a house?
 - A. To see clearly
 - B. To warm the house
- C. To discourage pests
 - D. To read comfortably

Std 5 pupils did the experiment below to investigate a certain process in plants.

The process being investigated is

- A. transpiration
- B. photosynthesis
- C. breathing
- D. absorption
- Std 5 pupils observed an animal with the 47. following characteristics;
 - (i) moist skin
 - (ii) lays eggs
 - (iii) lives partly on land and in water The animal is likely to be
 - A whale
- B. crocodile
- C. salamander
- D. duck
- Std 5 pupils did the experiment below. 48.

Which factor affecting floating and sinking were they investigating?

- A. Material
- B. Size
- C. Shape D. Mass
- Which weather instrument below is used to measure both the direction and strength of wind?
 - A. Windvane
 - B. Windsock
 - C. Liquid thermometer
 - D. Air thermometer
- 50. The chemicals used to control the growth of unwanted plants are called;
 - A. pesticides
 - B. acaricides
 - C. herbicides
 - D. insecticides
