

TERM TWO EXAMINATIONS
COMPUTER STUDIES
FORM ONE
MARKING SCHEME

1. Identify the input devices shown below

Name: Microphone	Name: Digitizer/Graphical tablet	Name: Fingerprint Scanner
		
Name: Optical Barcode Reader	Name: Joystick	Name: Trackball
		

Award 1 mark each max 6

2. Explain four types of Read-only Memory

- **Mask Read Only Memory (MROM)**-Data and instructions are written at the time of manufacture and cannot be changed afterward.
- **Programmable Read Only Memory (PROM)**-Data can be written once by the user after which it cannot be changed again.
- **Erasable Programmable Read Only Memory (EPROM)** – It is a ROM that can be erased and be programmed again when exposed to ultraviolet light.
- **Electrical erasable programmable read-only memory (EEPROM)**-this is a type of ROM that can be erased and reprogrammed electrically.

Award 1 mark each max 4

3. List four logical operations carried out by the Arithmetic Logic unit

- *Sorting*
- *Comparing*
- *Matching*
- *Merging*

Award 1 mark each max 4

4. State five application areas of digital cameras.

- *Web design*
- *Photojournalism*
- *Domestic photography*
- *E-commerce*
- *Security*
- *Criminal investigation*

Award 1 mark each max 5

5. Name five types of keyboards

- *Ergonomic keyboard*
- *Flexible Keyboard*
- *Standard keyboard*
- *Braille keyboard*
- *On-screen keyboard*
- *Wireless Keyboard*

Award 1 mark each max 5

6. Give five factors to consider when choosing an input device

- *Cost*
- *Suitability/Appropriateness*
- *Reliability*
- *Accuracy*
- *Volume of input*
- *Mode of operation*

Award 1 mark each max 5

7. State five differences between Static RAM and Dynamic RAM

<i>S RAM</i>	<i>D RAM</i>
▪ <i>Expensive</i>	▪ <i>Cheap</i>
▪ <i>Faster</i>	▪ <i>Slower</i>
▪ <i>Created using transistors</i>	▪ <i>Created using transistors and capacitors</i>
▪ <i>Consume less power</i>	▪ <i>Consume a lot of power</i>
▪ <i>Content remains intact with constant power supply</i>	▪ <i>Content is lost even with constant power supply</i>
▪ <i>Small</i>	▪ <i>Larger</i>

Award 1 mark each max 5

8. State five challenges experienced by Computers users who rely on Cathode Ray tube Monitors for display

- *Heavy and bulky*

- *Consume a lot of power*
- *Suffer from the screen in burn*
- *Generate a lot of heat*
- *Have low screen resolution*

Award 1 mark each max 5

9. Briefly describe five reasons which make microcomputers suitable for personal computing work

- *Portability-ease to carry from one place to another*
- *Small in size, therefore, occupies less space*
- *Consume less power*
- *Least expensive therefore many people can afford*
- *Handled varied tasks when installed with the right software*

Award 1 mark each max 5

10. Explain how computers are used in the following areas

(i) Universities

- *CCTV cameras installed at strategic points within the university provide maximum security*
- *Used for scheduling and time management using timetabling software*
- *Used to conduct research on the internet*
- *Keeping records and analyzing academic data using computer programs*
- *Monitor class attendance by learners through checking in and checking out from class through biometric systems*
- *Use computer simulations for dangerous experiments*
- *Communication takes place using different platforms like WhatsApp, sms, email, and Telegram*

Award 1 mark each max 5

(ii) Health facilities like Hospitals

- *Computer-based programs are used to control and manage life support systems (ICU)*
- *Computers can be used to carry out research through the internet*
- *Computer-based programs are used to allocate wards to patients*
- *Computers are also in hospitals to support telemedicine*
- *Computer programs are used to support devices like MRI machines which are used to give very accurate results*

Award 1 mark each max 5

11. Name five things that are likely to cause eye strain the computer room

- *Prolonged use*
- *Use of flickering screens*
- *Very dull screens*
- *Reflective walls*
- *Very bright screens*
- *Poor sitting posture*

Award 1 mark each max 4

12. State four differences between primary memory and secondary memory (4marks)

<i>Primary</i>	<i>Secondary</i>
▪ <i>Direct access by the processor</i>	▪ <i>Cannot be accessed directly by the processor</i>
▪ <i>Volatile</i>	▪ <i>Non-volatile</i>
▪ <i>Low storage capacity</i>	▪ <i>High storage capacity</i>
▪ <i>Expensive</i>	▪ <i>Cheap</i>

Award 1 mark each max 4

13. Explain the following terms as used in computing

- (a) POST
 - **Power On Self-Test (POST) is a process that the computer undergoes to check whether the resources attached to it are ready and available for use**
- (b) BIOS
 - **Basic Input Output System (BIOS) is a special firmware mounted on the motherboard as a chip its main role is to supervise and coordinate POST**
- (c) Firmware
 - **Is a combination of both hardware and software also referred to as silicon chips that contain program instructions known as stored logic that cannot be easily modified**

Award 2marks each max 6

14. List five features of the fifth-generation computers

- **Produce negligible heat**
- **Consume less power**
- **Very small in size**
- **Designed using very large-scale integration**
- **Mimic human experts**
- **Massive storage**
- **Handle processing very fast**
- **Support natural language processing**

Award 1 mark each max 5

15.

(i) Name three examples of softcopy output devices

- **Speaker**
- **Monitor**
- **LED**
- **Projector**

Award 1 mark each max 3

(ii) Kameno Construction Company intends to buy output devices they can use to produce road plans, maps and invoices. State two output devices you would advise the company to buy

- **Printing Road plans and Maps- Plotter**
- **Printing Receipts and Invoice – Impact printers**

Award 1mark each max 2

(iii) Give a reason for each choice in (ii) above

- **Plotter is suitable for printing large format hardcopy like maps, Architectural plans etc.**
- **Impact printers support printing of multiple copies like original , duplicate and triplicate copy**

Award 1mark each max 2

16. Kimani bought a flash drive of 8GB to store his personal files. He used half of it to save audio files, a quarter to save video clips, and half of the remainder to keep application programs

(i) Work out the space used to store application programs in Megabytes (3marks)

$$\text{Audio file} = \frac{1}{2}$$

$$\text{Video} = \frac{1}{4}$$

$$\text{Application} = \frac{1}{8}$$

$$\text{Used space } \frac{1}{2} + \frac{1}{4} + \frac{1}{8} = \frac{7}{8} * 8 * 1024$$

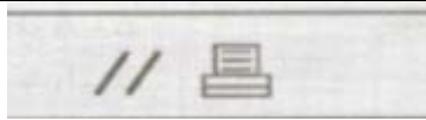

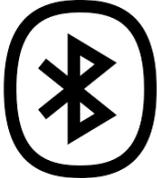

$$7168$$

(ii) Calculate the free space in flash (3marks)

$$1 - \frac{7}{8} = \frac{1}{8} * 1024 * 8$$

$$= 1024$$

17. On a computer, there are various ports that have various symbols which indicate where the various peripheral devices are connected. Identify the following symbols.

<p>Parallel port</p> 	<p>USB port</p> 
<p>SCSI</p> 	<p>Bluetooth</p> 

Award 1 mark each max 4

18. Karema and Justine wanted to acquire computers for their personal use. Karema bought a laptop at 70,000/= while Justine acquired a Desktop at 25,000. Suggest four factors that are likely to make Karema's computer to be more expensive

- *Processor speed and manufacturer*
- *Storage capacity (ROM, RAM, and Hard Disk)*
- *Portability*
- *Monitor resolution*

Award 1mark each max 4

19. State the standard units for measuring the Monitor size, Speed of the computer and Hard disk capacity

- *Monitor size- Inches*
- *Processor Speed – Hertz*
- *Hard Disk- Byte*

Award 1mark each max 3

20. Mention three items that when are installed in a computer enable it to support multimedia functions

- *Sound card*
- *Multimedia software*
- *Camera*
- *DVD drive*
- *Speaker*
- *XVGA Monitor*

Award 1mark each max 3
