## **ACADEMIC BREAKTHROUGH SERIES**

SASON 001

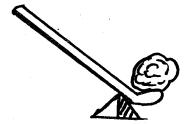

## STD. 8 YEAR - 2021

# **{8**}

## **SCIENCE**

Time: 1 Hr 40 Min.

- 1. In which part of the digestive system are mineral salts absorb?
  - A. Mouth
- B. Stomach
- C. Small intestines D. Large intestines
- 2. Which one of the following is not caused by force? Force:-
  - A. make objects to change state
  - B. make objects change their shape
  - C. stops objects from moving
  - D. makes objects change direction
- 3. Which one of the following is in the same class of levers as the one drawn below?

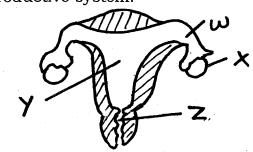

- A. Nut cracker
- B. Wheelbarrow
- C. Pliers
- D. Spade
- 4. Which one of the following diseases cannot be prevented by maintaining proper hygiene?
  - A. Bilharzia
- B. Cholera
- C. Anaemia
- D. Typhoid
- 5. The following are some characteristics of weeds:-
  - (i) Strong smell
  - (ii) Thorns on stem
  - (iii) Pink flowers
  - (iv) Purple or white flowers

Which **two** characteristics are of sodom apple?

- A. ii and iii
- B. ii and iv
- C. i and iii
- D. i and iv
- 6. Which one of the following pairs of vaccines is administered at birth?
  - A. BCG and DPT
  - B. DPT and measles
  - C. BCG and polio
  - D. Polio and measles
- 7. Which of the following statements is **true** about blood vessels?

- A. Aorta has valves
- B. Venacava has thin walls
- C. Pulmonary vein carries deoxygenated blood
- D. Pulmonary artery caries blood to the heart
- 8. Which one of the following methods of grazing is recommended for a farmer who wants to keep many animals on his farm?
  - A. Herding
- B. Tethering
- C. Padocking
- D. Zero grazing
- 9. The diagram below shows female reproductive system.

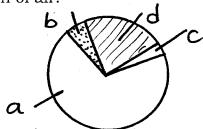

Which letter above shows where fusion of sex cells take place?

- A. **W**
- В. Х
- C. **Y**
- D. **Z**
- 10. An HIV patient had the following signs:-
  - (i) Looked normal and healthy
  - (ii) Tested negative
  - (iii) Could infect others

The patient was undergoing a stage called:-

- A. full blown
- B. window period
- C. incubation stage
- D. symptomatic stage
- 11. Which one of the following is **not** a common communicable disease?
  - A. Malaria
  - B. Tuberculosis
  - C. Typhoid
  - D. Tetanus
- 12. The **main** function of the red blood cells is to:-
  - A. transport hormones
  - B. help in blood clotting
  - C. transport oxygen in the body
  - D. fight germs

13. The pie chart below shows the composition of air.

Which portion shows the part of the air that supports life?

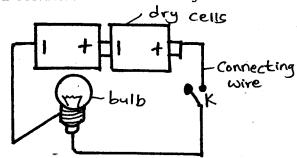

A. b

B. c

C. d

D. a

- 14. Which one of the following is a reason why infants are immunized?
  - A. To enable the child grow faster
  - B. To prevent the child from contraction some diseases
  - C. To make their teeth and bones strong
  - D. To treat diseases which a child may inherit from the mother
- 15. Which one of the following are both reasons for lighting a house?
  - A. Safety and drying
  - B. Seeing clearly and warming
  - C. Drying and warming
  - D. Safety and discouraging pests
- 16. The diagram below represents a set-up that can be used to investigate good and bad conductors of electricity.

Which one of the following materials when used to connect wires at position **K** would make the bulb light?

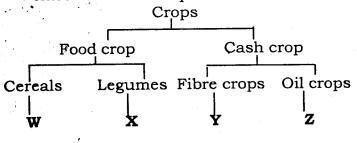

A. Glass rod

B. Wet thread

C. Rubber

D. Plastic ruler

17. The chart below represent simple classification of crops.

Which one of the following crops are **correctly** represented by **W**, **X**, **Y** and **Z** respectively?

- A. Rice, greengrams, kales, cotton
- B. Sorghum, peas, sisal, coconut
- C. Greengrams, wheat, sisal, pawpaw
- D. Pea, wheat, sunflower, cotton
- 18. A child was diagnosed with the following signs and symptoms:-

#### (i) Loose skin

(ii) Sores at the corner of the mouth (iii) Weakness

#### (iv) Swollen body parts

Which one of the following foods should the child be fed on?

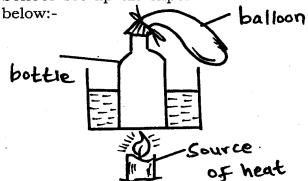

A. Milk

B. Yams

C. Fruits

D. Vegetables

- 19. Which one of the following is not a reason why a young couple should take a HIV test?
  - A. To avoid HIV re-infection
  - B. To plan for the future
  - C. To promote stigmatisation
  - D. To seek information on nutrition
- 20. Standard five pupils of Shariani Primary School set-up an experiment as shown

What was their observation after sometime?

- A. The balloon got inflated
- B. Drops of water formed in the bottle
- C. Drops of water formed in the balloon
- C. The balloon was blown away
- 21. Which one of the following food preservation methods make microorganisms inactive?
  - A. Drying
- B. Using low temperatures
- C. Salting D. S
- D. Smoking
- 22. Class six pupils put seeds in water and placed them in a cold room. Which of the following conditions necessary for germination were they investigation?
  - A. Air

B. Warmth

C. Light

D. Moisture

- 23. Three of the following are true about | 31. Insectivorous plants grow in soil that insect pollinated flowers except:-
  - A. large, brightly coloured petals
  - B. strongly scented, sticky stigmas
  - C. hairy stigmas, loosely attached anthers
  - D. produce nectar, anthers firmly attached to flowers
- 24. Which one of the following parts of a flower is not correctly matched with its functions?

#### Part of a flower Function

A. Stigma

Produces pollen

B. Pollen grains

Fertilise ovules

C. Style

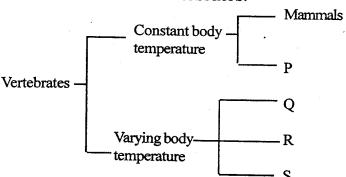

Supports stigma

D. Filament

Supports anther

- 25. Which one of the following is the most effective control measure against the spread of malaria?
  - A. Sleeping under a mosquito net
  - B. Use a mosquito repellant
  - C. Treating of infected persons
  - D. Draining of stagnant water
- 26. Three of the following plants have common characteristics. Which one is not?
  - A. Algae
  - B. Toadstools
  - C. Puffballs
  - D. Mushrooms
- 27. Which one of the following is **not** a form of special sound?
  - A. Screaming
  - B. Ringing a bell
  - C. Hooting
  - D. Singing
- 28. In a flower fertilization takes place in the:-
  - A. stigma
  - B. pollen tube
  - C. ovary
  - D. ovule
- 29. Sheet erosion is also called:-
  - A. landslide
  - B. splash
  - C. rill
  - D. spatter
- 30. Which blood component fight germs in the body?
  - A. White blood cells
  - B. Red blood cells
  - C. Platelets
  - D. Plasma

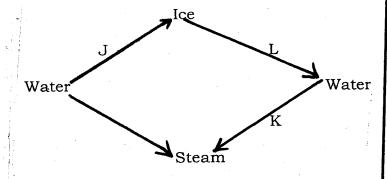

- lacks:-
  - A. oxygen
  - B. water
  - C. nitrogen
  - D. living organisms
- 32. Which blood vessel carries deoxygenated blood to the heart?
  - A. Aorta
  - B. Vena cava
  - C. Pulmonary vein
  - D. Pulmonary artery
- 33. The **best** way to allow sunlight in a house is to use:-
  - A. electricity
  - B. large windows
  - C. skylight
  - D. a chimney
- 34. The chart below shows a simple classification of vertebrates:-

Which one of the following groups of vertebrates does P represent?

- A. Reptiles
- B. Amphibians
- C. Birds
- D. Fish
- 35. In a certain investigation on sound energy, a teacher rang a bell and then whistled as the pupils listened. Which one of the following was being investigated?
  - A. Types of sounds
  - B. Special sounds
  - C. Sound pollution
  - D. Direction of sound
- 36. Which one of the following instruments is used to measure two different aspects of weather?
  - A. Wind vane
  - B. Thermometer
  - C. Rain gauge
  - D. Windsock

- 37. Which one of the following methods of controlling weeds requires use of farm tools?
  - A. Digging and mulching
  - B. Chemical and digging
  - C. Uprooting and mulching
  - D. Digging and slashing
- 38. In Kenya, rivers passing through cities are mainly polluted by:-
  - A. industrial wastes
  - B. oil spillage
  - C. soil erosion
  - D. agricultural chemicals
- 39. Which one of the following disease symptoms is for cholera?
  - A. Vomiting and diarrhoea
  - B. itchiness and coughing
  - C. Blood in stool
  - D. blood in urine
- 40. Which one of the following is the least effective control measure for sexually transmitted diseases among married couples?
  - A. Be faithful to their partners
  - B. Use of sterilised personal items
  - C. Testing and counselling
  - D. Abstinence
- 41. Name the process labelled **J**, **K** and **L** in the diagram below respectively.

- A. Freezing, condensation, evaporation
- B. Condensation, evaporation, melting
- C. Melting, freezing, condensation
- D. Freezing, evaporation, melting
- 42. Which one of the following completes a list of field pest **only**?
  - A. Weaver birds, weevils, rats
  - B. Aphids, cutworms, termites
  - C. Stalkborers, weevils, rats
  - D. Weaver birds, stalkborers, aphids
- 43. Which of the following is **not** a communicable disease?

- A. Whooping cough
- B. Tuberculosis
- C. Tetanus
- D. Measles
- 44. The purpose of salt in food preservation to:-
  - A. remove water
  - B. remove air
  - C. add flavour
  - D. lower the temperature
- 45. Which one of the following is **not** a magnetic material?
  - A. Steel
  - B. Iron
  - C. Tin
  - D. Copper
- 46. Which one of the following does **not** need to be the same while testing drainage?
  - A. Time duration
  - B. Amount of soil
  - C. Amount of cotton wool
  - D. Type of soil
- 47. Babies born by a mother who smoke during pregnancy suffer from the following health problem except:-
  - A. fast learners
  - B. under weight
  - C. weak immune system
  - D. poor mental growth
- 48. Cigarettes addiction is caused by a component of tobacco known as:-
  - A. caffeine
  - B. carbon dioxide
  - C. tar
  - D. nicotine
- 49. Oxygenated blood flows to the left auricle through the:-
  - A. venacava
  - B. pulmonary artery
  - C. aorta
  - D. pulmonary vein
- 50. Why are utensils made of metals sometimes fitted with rubber or wooden handle?
  - A. To conduct heat properly
  - B. To insulate them
  - C. To make them last longer
  - D. To make them attractive
